

Full Name: Veera Palla

Sr. React.js/Node.js Developer

Email: veerapalla.work28@gmail.com

Phone: (989) 318-3683

LinkedIn: Veera Palla

PROFESSIONAL SUMMARY:

- 11+ years of experience building scalable, high-performance applications using **React.js 18.3.2, Next.js 15, Node.js 19/21, TypeScript, Python, FastAPI, Flutter, Angular.js, Vue.js, Spring Boot, and .NET WebAPI**, with expertise in **cross-platform user experiences** and **MVC architecture**.
- Skilled in **TailwindCSS, BEM, Atomic Design, CSS Architecture, Material-UI, Bootstrap, and FIGMA**, focusing on **UX design**, modular, maintainable, and visually consistent interfaces.
- Proficient in **Node.js, Next.js APIs, DrizzleORM, Mongoose, Hibernate, DynamoDB, CosmosDB, Neo4j**, designing schemas and implementing **CRUD operations, RESTful and GraphQL APIs**, ensuring scalable back-end solutions.
- Experienced with **Vue Router, RxJS/NxJS**, microservices, **SSR/SSG/ISR**, and state management (**Redux, Zustand, Vuex**), following **TDD/BDD** methodologies for robust and maintainable applications.
- Extensive cloud experience with **AWS (Lambda, EC2, EKS, Bedrock, Glue, Athena, SageMaker), GCP (Vertex AI, Gemini AI, Stackdriver, Pub/Sub, BigQuery, GKE), and Azure (APIM, ACR, Eventhub, Azure DevOps, ADF, Synapse)**, deploying **cloud-native microservices, CI/CD pipelines, containerization, and orchestration**.
- Hands-on experience integrating **GenAI and LLMs** using **AWS Bedrock, Vertex AI, Gemini AI, and TensorFlow.js** for predictive analytics, NLP, recommendation systems, and generative AI features.
- Skilled in **event-driven architectures and messaging systems** using **Kinesis, Pub/Sub, Eventhub, RabbitMQ, Kafka**, enabling real-time data pipelines and scalable distributed systems.
- Expertise in **testing and automation** using **Jest, Mocha, Chai, Cypress, Selenium, Enzyme, POSTMAN, OAuth2 & JWT authentication, GitHub CLI and GitHub Copilot**, Agile/SCRUM methodologies, performance optimization, caching strategies, modular CSS/UI architecture, and **Spring Boot MVC and Hibernate frameworks** for highly scalable and maintainable systems.

TECHNICAL SKILLS:

Full-Stack	React.js 18.3.2, Vue.js, Next.js 15/11, Angular 2+, AngularJS, HTML5, CSS3, JavaScript (ES6+/ES7), TypeScript, React Native, Redux, Redux Toolkit, React Query, Zustand, NgRx, Material-UI (MUI), Ant Design, Chakra UI, Bootstrap, Node.js 19/21, Express.js, Next.js APIs, Nest.js, FastAPI, Python, Spring Boot, .NET WebAPI, Golang.
Databases	MongoDB, PostgreSQL, Neo4j, DynamoDB, CosmosDB, Apache Cassandra, Redis, Memcached, DrizzleORM, Hibernate.
Cloud Services	AWS, GCP, Azure
Testing	Jest, Mocha, Chai, Cypress, Selenium, Enzyme, React Testing Library (RTL), Playwright, Postman, SoapUI, JUnit, Jasmine, Mockito, Splunk, Sentry, Datadog.
APIs	RESTful APIs, GraphQL, gRPC, WebSockets, OAuth 2.0, JWT, SSO, Swagger UI.
UI/UX Tools	Figma, Adobe XD, Sketch, Storybook, Atomic Design, BEM, WCAG compliance.
Build Tools	Webpack, Babel, Vite, NPM, Yarn, PNPM, Grunt, Gulp.
Monitoring & Debugging Tools	Prometheus, Grafana, CloudWatch, Stackdriver, LogRocket, Splunk, Sentry, Datadog.
Agile Tools	JIRA, Confluence, Trello

PROFESSIONAL EXPERIENCE:

Comerica Bank, Auburn Hills, MI
Sr. React/Node developer

Jun 2024 – Till Date

Responsibilities:

- Developed scalable, high-performance web and mobile applications using **React 18.3.2, Next.js 15, TypeScript, Node.js 19/21, Python, FastAPI, and Flutter**, supporting real-time dashboards, SPAs, mobile-first apps, and transaction workflows.
- Built responsive, accessible, and user-centric UIs with **Tailwind CSS, Material UI, Atomic Design, BEM, Figma, and WCAG compliance**, ensuring consistent cross-device experiences and excellent UX.
- Managed complex state and asynchronous data with **Redux Toolkit, RTK Query**, integrating **RESTful and GraphQL APIs**, with **Postman and Swagger UI** for API validation and documentation.
- Designed and optimized **databases and data workflows** using **PostgreSQL, MongoDB, Neo4j, Drizzle ORM, DynamoDB, Glue, and BigQuery**, supporting **high-volume transactions, graph data models, and analytics pipelines**.
- Integrated AI-powered features into MERN applications using **ChatGPT APIs**, implementing **RAG** with **MongoDB** to enable contextual search, conversational interfaces, and intelligent workflow automation through **Agentic AI** patterns.
- Implemented **real-time, event-driven architectures** with **WebSockets, Socket.io, SSE, Kafka, RabbitMQ, Pub/Sub, and Kinesis**, enabling low-latency dashboards, messaging, and streaming workflows.
- Built **secure, scalable APIs and microservices** using **Node.js, Nest.js, Express.js, FastAPI**, with **OAuth 2.0, JWT, RBAC, and SSO**; integrated **LLM-based AI features** using **AWS Bedrock, VertexAI, and GeminiAI**.
- Leveraged **cloud-native, CI/CD, and DevOps practices** with **Docker, Kubernetes, Helm, Jenkins, GitHub Actions, AWS (EC2, Lambda, SageMaker, CloudWatch, Glue, DynamoDB, Kinesis), GCP (GKE, Pub/Sub, BigQuery, Stackdriver, VertexAI, GeminiAI), Prometheus, Grafana, NPM, Grunt, Gulp, Webpack, and Vite** for scalable deployment, monitoring, and continuous delivery.
- Conducted **unit, integration, and regression testing** with **Jest, Mocha, Chai, Cypress, and Enzyme**, optimized **system performance and transaction throughput**, and collaborated in **Agile/Scrum teams** for sprint planning, code reviews, and continuous delivery.

Environment: HTML5, CSS3, JavaScript, TypeScript, ReactJS 18.3.2, Redux, Axios, Node.js 21, Express.js, Jest, Mocha, Chai, PostgreSQL, Neo4j, Next.js, AWS, GCP, Docker, Kubernetes (K8s), Helm, Jenkins, GitHub Actions, Prometheus, Grafana, Swagger UI, OAuth 2.0, JWT, Vite, Webpack, JIRA, Git, Ubuntu.

UCLA Health, Los Angeles, CA
Sr. React/Node developer

Sep 2021 – May 2024

Responsibilities:

- Developed **scalable, high-performance web and mobile applications** using **React 17/Next.js 11, TypeScript, Node.js 16, Python, FastAPI, and Flutter**, supporting **SPAs, server-side rendered pages, mobile-first apps, and transaction workflows**.
- Built **responsive, accessible, and user-centric UIs** with **Tailwind CSS, Material UI, Atomic Design, BEM, Figma, and WCAG compliance**, ensuring consistent cross-device UX.
- Managed **complex state and asynchronous data** with **Redux, RTK Query**, integrating **RESTful, GraphQL, and gRPC APIs**, and conducting **API testing and documentation** via **Postman and OpenAPI (Swagger)**.
- Designed and optimized **databases and data workflows** using **PostgreSQL, MongoDB, Neo4j, Drizzle ORM, DynamoDB, Glue, BigQuery, and Synapse**, supporting **high-volume transactions, graph-based data modeling, analytics pipelines, and EMR/FHIR-based healthcare workflows with HIPAA compliance**.
- Implemented **real-time, event-driven architectures** with **WebSockets, Socket.io, SSE, Kafka, RabbitMQ, Eventhub, and Kinesis**, enabling low-latency dashboards, streaming workflows, and notifications.
- Built **secure, scalable APIs and microservices** with **Node.js, Express.js, Nest.js, FastAPI**, integrating **OAuth 2.0, JWT, RBAC, SSO**, and exposing APIs via **APIM**, while ensuring **HIPAA-compliant data handling**.
- Leveraged **cloud-native, CI/CD, and DevOps practices** with **Docker, Kubernetes, Helm, Jenkins, Azure DevOps, GitLab CI, AWS (EC2, Lambda, SageMaker, CloudWatch, Glue, DynamoDB, Kinesis), Blob Storage, CDN, ACR, ADF, Prometheus, Grafana, NPM, Grunt, Gulp, Webpack, and Vite**, enabling automated, scalable deployments.
- Conducted **unit, integration, and end-to-end testing** using **modern JavaScript (ES6), Jest, Mocha, Chai, Enzyme, Cypress, and Playwright**, optimized **system performance and transaction throughput**, and collaborated in **Agile/Scrum teams** for sprint planning, code reviews, and continuous delivery.

Environment: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Redux, Next.js, Node.js, Express.js, Nest.js, REST, GraphQL, OpenAPI, OAuth2, JWT, MongoDB, PostgreSQL, Neo4j, Jenkins, GitLab CI, Docker, Postman, Gulp, Grunt, Jira, VS Code, AWS, GCP BigQuery, Cypress, Playwright, Jest, Mocha, Chai, Enzyme.

Dillard's, Little Rock, AR
MERN Stack Developer

Nov 2018 – Aug 2021

Responsibilities:

- Developed **responsive, high-performance web applications** using **MERN stack (MongoDB, Express.js, React.js, Node.js)** with **TypeScript and JavaScript**, integrating **Next.js** for server-side rendering and **NPM** for dependency management and build workflows.
- Built **RESTful APIs** with **Node.js/Express.js, Spring Boot (Hibernate), and Golang**, leveraging **GraphQL** for optimized data fetching, and integrated **Kafka/RabbitMQ** for event-driven messaging and asynchronous processing.
- Designed **reusable React components**, implemented **Redux, Context API, and React Hooks**, and enhanced **UI/UX** across web and **React Native mobile applications** for iOS and Android, applying **CSS best practices** for modern, responsive design.
- Integrated third-party APIs including **Twitter API** to enrich platform functionality and enhance user engagement.
- Architected and deployed **cloud infrastructure** on **Azure** (App Services, AKS, Blob Storage, AD, Key Vault, Data Lake, CDN) and **AWS** (Lambda, CloudWatch), ensuring scalable, secure, and monitored applications.
- Developed backend microservices using **Golang, Node.js, and Spring Boot**, handling high-volume asynchronous processing, event-driven architecture, and secure authentication with **JWT** and **OAuth**.
- Enhanced application performance and scalability by implementing **Webpack, Vite, lazy loading, and code splitting**, and managing **MongoDB, Neo4j, and PostgreSQL** databases for maintainable full-stack solutions.
- Streamlined development workflows and ensured code quality through automated **CI/CD pipelines** with **Jenkins, Docker, Grunt, and Gulp**, and comprehensive unit/integration testing using **Jest, Mocha, Enzyme, and Selenium**.

Environment: HTML5, CSS3, JavaScript, React.js, Azure, AWS, React Native, Redux, Node.js, Express.js, MongoDB, JWT, Webpack, Jest, Mocha, Postman, Git, Jenkins, JIRA, Docker, Ubuntu.

KeyBank, Cleveland, OH
Full Stack Developer

Dec 2016 – Sep 2018

Responsibilities:

- Developed and optimized **RESTful APIs** using **Node.js** and **.NET WebAPI**, implementing **CRUD operations** and integrating **RabbitMQ** for asynchronous messaging between microservices.
- Built **dynamic, responsive front-end applications** using **Angular, Vue.js, Vue Router, and Nuxt.js**, ensuring smooth navigation, real-time updates, and SEO-friendly server-side rendering.
- Managed **MongoDB** and **PostgreSQL** databases, designing **schemas**, optimizing **queries**, and ensuring large-scale **data handling** for banking applications.
- Automated front-end **build** and **workflow processes** using **Grunt** and **Gulp**, and tested **APIs** using **Postman** to validate endpoints and improve reliability.
- Implemented secure **authentication** and **authorization** using **JWT** and **OAuth**, protecting sensitive customer and transaction data.
- Containerized **microservices** with **Docker**, deployed on **AWS (S3, EC2, Lambda, CloudFront)**, and set up **CI/CD pipelines** using **Jenkins** to ensure scalability, reliability, and rapid releases.
- Ensured **code quality** and **stability** through **unit and integration testing (Mocha, Chai, Jest, Karma, Enzyme)** and actively participated in **Agile workflows**, including **sprint planning, daily standups, and retrospectives**.

Environment: Node.js, .NET WebAPI, Angular, Vue.js, Vue Router, Nuxt.js, Express.js, MongoDB, PostgreSQL, Mongoose, RabbitMQ, Grunt, Gulp, CRUD, Postman, AWS (EC2, S3, Lambda, CloudFront), Docker, GraphQL.

Foxconn, India
UI/UX Developer

Jun 2013 – Nov 2016

Responsibilities:

- Designed and developed **responsive web and mobile interfaces** using **AngularJS, Angular, JavaScript, HTML, CSS3, Bootstrap, jQuery, and AJAX**, ensuring seamless user experiences across devices.

- Created **wireframes, mockups, and prototypes** with **Sketch and Figma** to validate user flows and design concepts, collaborating closely with product managers, UX researchers, and engineers.
- Developed **dynamic, interactive, and reusable Angular components and services**, implemented navigation with **Angular Router**, and optimized performance using **lazy loading, Change Detection strategies (OnPush), caching, and AOT compilation**.
- Integrated **RESTful APIs** and **D3.js visualizations** for efficient data handling and clear presentation of complex datasets.
- Ensured **accessibility and usability** by adhering to **WCAG standards** and conducted **cross-browser and device testing** to maintain consistent performance.
- Participated in **Agile processes** (daily standups, sprint planning, retrospectives) to deliver projects on time, while using tools such as **Node.js, Git, Jira, Visual Studio Code, and Postman**.

Environment: HTML, CSS3, JavaScript, jQuery, Sketch, D3.js, Angular, Vue.js, AJAX, WCAG, UX/UI Design.
